Education

Sri Krishna College of Engineering and Technology

Integrated M.Tech, Computer Science and Engineering

2023 – 2028

Coimbatore, Tamil Nadu

Crescent Castle Public School

ISC (Class XII): **84.5%** ICSE (Class X): **90.1%**

2009 – 2023

Ooty, Tamil Nadu

Technical Skills

Languages: Python, JavaScript, Java, Tailwind CSS

Backend: Node.js, Express, Flask, REST APIs

Databases: MongoDB, PostgreSQL, SQLite

Systems & Platforms: Linux, Cloudflare Workers, Azure, AWS

Tools & Platforms: Git, GitHub, Docker, Linux (OS and VPS), Vercel, Cloudflare Stack (Workers, KV), Burp Suite

Concepts: Object Oriented Programming, Operating Systems, Cloud Computing, Information Security Systems, Artificial Intelligence

Experience

Freelance Web Developer

2024 – Present

Freelance

Remote

- Built and deployed production websites for small businesses with focus on performance and usability.
- Engineered responsive interfaces that ensure consistent experience across devices and screen sizes.
- Translated client requirements into scalable solutions with clean UI and reliable backend integration.

Technical Projects

Automated Result Notifier | Python, Node.js, Azure, Mongo DB

- Built a **real-time monitoring system** for university result portals, delivering instant notifications to **60+ active users**.
- Engineered **efficient polling mechanisms** for dynamic content while minimizing redundant requests.
- Handled **unpredictable release timings** with robust detection logic.

Code Sync | Cross-Platform DSA Aggregator | Node.js, MongoDB, OpenAI 4.0, Tailwind CSS

- Built **authenticated scraping pipelines** using session tokens for platforms like LeetCode and GeeksforGeeks.
- Enabled unified tracking of user activity by consolidating data from multiple platforms into a single system.
- Solved **session handling and cross-platform mapping challenges**.

Morphide | IoT Development IDE | JavaScript, Node.js, Python, ESPTool, arduino-cli

- Developed an **IoT IDE** with **device fingerprinting and firmware inspection**.
- Built **hardware identification mechanisms** to detect mismatched or unknown firmware states.
- Integrated **AI-assisted tooling** for embedded workflows.

SKCET CGPA Calculator | JavaScript, Node.js, CloudFlare Workers

- Deployed a calculator used for **17,000+ computations in a single semester**.
- Achieved **#1 Google ranking** for “SKCET SGPA calculator”.

Achievements

Vulnerability Disclosure – Broken Object Level Authorization (BOLA)

- Identified a critical BOLA vulnerability in a live EdTech platform exposing exam content before scheduled release; reported responsibly to prevent exploitation.

Security Disclosure – Internal System Vulnerabilities

- Discovered and responsibly disclosed a **privilege escalation vulnerability** in an internal college system that allowed unauthorized access to user accounts, including high-privilege roles.
- Reported a **leaked internal software exposure**, helping prevent potential misuse and strengthening system security.

Infrastructure Load Testing

- Developed a framework to simulated high request throughput against college systems with a professional team to identify network bottlenecks under burst traffic conditions.

Vice Secretary – Sysstrons Club

- Held a leadership position in the college technical club.
